Fire Records Without a Purok

The 41 Sure and Likely fires were applied to the app on 6 November 2026. The Estimates and the fires at barangay level were not.

This review now covers fires only. All flood and landslide history was removed from Geoalert on 6 November 2026, so the 79 fire records are the ones left without a purok. A backup of the removed records is in Downloads.

16	25	17	21
Sure	Likely	Estimate	Stay at barangay

58 of the 79 fire records have a proposed place. The other 21 stay at barangay level, because no source says where they happened. They are listed in Part 4 so nothing is lost.

What each rating means

Rating	Meaning	Records
Sure	The record names that exact road or subdivision and the app already has its area, or a government report names the purok.	16
Likely	A real map address, pin or news report places it, or the record names a street or sitio and news places it on a road crossing these areas. A road crossing two areas links to both.	25
Estimate	Worked out from indirect evidence, such as what burned or a place known only from a nearby name. It could be wrong.	17
Stays	Stays at barangay level. No source gives a more exact place.	21

How this reaches the map

- Records marked "Link to existing area" need no new map work.
- Records marked "New area" need 18 new named areas, listed in Part 5. With the new names and subdivisions the map went from 374 to 567 areas, and outlines moved a lot, so older screenshots no longer match.
- The placements live in fire_places.csv, which the importer reads, so a re-import keeps them.
- A record linked to two or more areas counts once in each of them, so a fire on a shared road adds to both.
- Dates are in Manila time.

Fire	Jaclupan	2024-03-31	Camp 2, Jaclupan, Talisay City Cebu	**Camp 2** NEW AREA	Google address: campo 2, EEA village. The pin falls 400 m over the Maghaway line on the PSA outline, but DPWH pins Sitio Tinubdan, Purok Narra and Sitio Kimawa of Jaclupan on that side too, so the PSA line is off here
Fire	Lagtang	2024-05-07	Tangub, Lagtang, Talisay City Cebu	**Sitio Lupa + Purok Makugihon**	SunStar 2022 puts the checkpoint for the Manipis road in Sitio Tangub, and a 2014 report puts Tangub on the national highway. Fire	Maghaway	2025-07-28	Casamira, Maghaway, Talisay City Cebu	**Casa Mira** NEW AREA	Google pin is 57 m past the Maghaway line, and its address says Sandayong, Minglanilla. The area would start at the nearest point inside Maghaway

Fire	Tapul	2024-05-03	Purok 7, Tapul, Talisay City, Cebu	**Purok 7** NEW AREA	Google Maps address: Tapul purok7

Part 3. Estimate (17)

Your decision. These colour a purok on indirect evidence, so a wrong one would mark the wrong neighbourhood. No search raised these to Likely.

Hazard	Barangay	Date	Address in the record	Proposed place	Why
Fire	Cansojong	2023-06-29	ABALO S., BRGY CANSOJONG	**Near Lokal ng Cansojong**	Abalo Road and Abalo Beach lie just over the line in Tangke (Overture, Google Maps). This is the nearest Cansojong area, 128 m from them
Fire	Dumlog	2023-06-11	BRGY DUMLOG	**Sitio Bahala + Purok Okra**	A truck fire, P3 million. The record gives only the barangay. The South Coastal Road is the main road through Dumlog, and these two areas hold 98% of it

Fire	Lawaan I	2025-04-23	Lawaan 1, Talisay City Cebu	**Near Lawaan Elementary School**	A motorcycle fire. The record gives only the barangay. Both main roads in Lawaan I cross this area, which holds the largest share of them
Fire	Lawaan I	2025-08-01	Lawaan 1, Talisay City, Cebu	**Near Lawaan Elementary School**	A bus fire. The record gives only the barangay. Both main roads in Lawaan I cross this area, which holds the largest share of them
Fire	Lawaan III	2025-03-19	Purok Chicos, Lawaan 3, Talisay City Cebu	**Sitio Riverside** NEW AREA	The name is known, but no map shows it. In Typhoon Tino it flooded when the Mananga overflowed, so it lies by the river in Lawaan III, and Sitio Riverside is the mapped riverside place there. Ask the Barangay Hall.
Fire	Pooc	2023-12-05	Centro 1, Pooc, Talisay City, Cebu	**Sitio Centro** NEW AREA	SunStar 2024 confirms Sitio Centro in Pooc. ArcGIS lists a Centro Store here, beside Sitio Tabay. A shop name is only a weak lead

Fire	San Isidro	2024-03-22	San Isidro, Talisay City Cebu	**Greenville**	A health care fire. The record gives only the barangay. Cebu South Medical Center and the clinics around it stand in this area

Fire	Tabunok	2024-08-21	Nacario St., Tabunok, Talisay City, Cebu	**Purok Matinahuron**	Google shows a Nacario Compound in this area. The Nacario Market and Nacario Trade Center stand about 1 km west, so the street could be there instead
Fire	Tabunok	2026-02-25	Nacario St., Tabunok, Talisay City Cebu	**Purok Matinahuron**	Google shows a Nacario Compound in this area. The Nacario Market and Nacario Trade Center stand about 1 km west, so the street could be there instead

Part 4. Stays at barangay level (21)

No source says where these happened. Guessing would colour the wrong purok, so they stay at barangay level. 8 of the 21 fires here are vehicle, rubbish, grass or electric pole fires, which leave no public trace. Any further detail would be in the BFP incident files.

What was searched

Every one of these records was searched. The searches below are what the "Stays" rating rests on.

- Google Maps: 436 searches in all. They covered each barangay by purok, sitio, subdivision, chapel and court; each unplaced name directly; and 84 searches of everyday businesses in 7 barangays, whose addresses often name the purok. That last pass read 651 businesses and found only 3 new purok names.
- Damage match: the date, cost and alarm level on the BFP sheet were matched to news reports. This placed the Sambag 2 convent fire and the Rabaya St. warehouse fire, and confirmed the Fidel Bas St. junkshop fire.
- ArcGIS geocoder: each hard name and its spelling variants. It gave no place for any of them. Waze refused automated searches, so it was not used.
- DPWH: the public project list, 353 Talisay projects, 252 with map pins. It names sitios along the Mananga River, and each unplaced name was searched in it. None were found.
- News sweep: police and fire reports in SunStar, The Freeman and CDN Digital, one search for each of the 22 barangays. It located Sitio Tangub, confirmed Sitio Cassare and Sitio Centro, and added 23 names to the list.
- Overture: 3,543 places inside the city, searched by address for each unplaced name. This located Zone 2 in San Isidro and showed where the Nacario places and Abalo Road are.
- What burned: the type of property on the sheet was used for vehicle and health care fires. Radio news sites, YouTube and Facebook posts in search results were also tried, and added nothing.
- Exact dates: eight more small fires were searched one by one by date, with no result. The convent and warehouse fires were found this way, but they were large enough to be reported.
- Roads: each named road was measured through every area using OpenStreetMap.
- Last checks: news searched again by date for the larger fires, Wikimapia searched by name, PhilGEPS notices and 35 city PDFs. The PDFs are scans with no readable text. Bing Maps would not load.
- Old maps: the 1964 1:50,000 sheet 3750 I (ANU) stops just east of Talisay. The sheet covering the city, 3750 IV, was not found online.
- DSWD DROMIC: the full list of Talisay fire reports. DSWD reports fires that displaced families, so small fires are not in it.
- News: larger fires were searched by date and place. Small vehicle, rubbish, grass and electric pole fires were searched in groups by date and type, not one search each. None were found.
- Maps and records: Wikimapia (1,538 places), OpenStreetMap, Overture Maps, GeoNames, about 370 Visayan Electric notices, the BIR zonal schedule, and the 2004 and 2010 city barangay pages.
- Cebu Daily News blocks direct reading, so its reports were read only through search excerpts. Facebook pages could not be read.
